

New Head Gasket Set for Caterpillar® C7 engines

AFA Industries is pleased to announce the availability of a new Head Gasket Set for Caterpillar C7 engines:

ON-HIGHWAY application serial numbers including FML, FMM, JRT, LBM, WAX, KAL, NPH, RMF, SAP, TSK, YPG, & C7S. This also can be used for INDUSTRIAL application serial numbers including JKL, JTF, JRA, & PRY

AFA Part Number AFA-HGSC7-1 head gasket set is in stock and available.

This kit features our proprietary multi-layer steel core head gasket that provides superior sealing

Multi-layer construction ensures maximum sealing power under differential expansion and contraction between head and block. Rigid steel core guarantees uniform thickness control across the sealing surface of every engine application. Precision engineering of ring wire and stainless combustion seal rings provides the highest level of sealing between head and block.

Other gaskets and components in this head gasket set are produced in our state-of-the-art manufacturing plants and include:

- * Soft gaskets are made to improve performance over and above OE standard, made from the highest gasket material available in the industry, resulting in robust solutions that satisfy the most stringent requirements.
- * Technologically advanced, molded, rubber-edge steel
- * Stamped steel with embossed beading
- * O-rings are molded in a variety of specially formulated, high performance rubber compounds engineered to meet each application's particular sealing needs.
- * And other application-specific materials.

AFA offers a complete line of parts for a variety of Detroit Diesel® engines, including Cylinder, Valve Train, Water and Oil pump, Cooling System, Fuel System, and other parts to facilitate most engine repairs.

Consult your OE reference materials for exact applications.
Refer to the OEM service manual for proper engine assembly procedures.
Contact your local sales representative or AFA Certified Distributor for more information.
